BUILDING SPECIALISTS

## **OCCUPATIONAL HEALTH AND SAFETY POLICY**

Chatsworth Constructions and its associated companies recognises the importance of providing a safe and healthy working environment for all employees.

Chatsworth Constructions also acknowledges its responsibilities to ensure that the Occupational Health and Safety Act 2004 and accompanying Regulations and Codes of Practice are attained to the highest standards.

We believe the development and maintenance of a safe and healthy workplace involves all employees and that consultation between management and employees, or the elected health and safety representatives, is an essential element of that process.

It is the responsibility of managers to continually review their operations and working conditions and where required provide adequate instruction, information, training and supervision.

Employees and Sub Contractors are expected to perform their duties in accordance with safe working practices, ensuring their own health and safety and that of others.

All personnel are required to be involved in and committed to a continuing program of improvement that will ensure a safe and healthy working environment.
